# KG International

---

KG International offers successful consulting services with the highest level of professional competence. During our early activity, we have been developing sale channels in multiple sectors, then, with the accumulated experience, KG expanded it's know-how to the foreign markets via the development of complete internationalization processes.

Our cooperation with other companies and associations allows us to take on Trade Missions, as well as promote Workshops to present the Polish and Eastern European markets. We also believe that the participation in International Fairs can grant our clients an excellent starting point for the exploration of new markets, thus helping the companies to prepare these actions is also one of our services.

## Team:

KG International has a team of Portuguese and Polish consultants experienced in strategy implementation and with full disposal to make Your company thrive in the Polish and Eastern European markets.
